

Assignment 7

Vedant Bhandare (cs21btech11007)

Abstract—This document contains the solution for Assignment 7 (CBSE Class 12 Chapter 13 Exercise 13.2 Question 6)

Question 6: Let E and F be events with $P(E) = \frac{3}{5}$ and $P(F) = \frac{3}{10}$ and $P(EF) = \frac{1}{5}$. Are E and F independent?

Solution : Given ,

$$P(E) = \frac{3}{5} \quad (1)$$

$$P(F) = \frac{3}{10} \quad (2)$$

$$P(EF) = \frac{1}{5} \quad (3)$$

Two events, say A and B, are said to be independent if

$$P(AB) = P(A)P(B) \quad (4)$$

$$(5)$$

We have,

$$P(E)P(F) = \frac{3}{5} \times \frac{3}{10} = \frac{9}{50} \neq P(EF) \quad (6)$$

Thus, E and F are not independent events.
